HOME ORGANIZER™

HOME INVENTORY

All your belongings at your fingertips — whenever you need to know what you have and where it is!

- Organize everything in the garage, toolshed, attic or basement.
- Keep track of what you lend to whom, and when.
- Even keeps a record of your credit cards and identification.
- Lets you give everything a serial number and $ value.
- Especially helpful for items you use infrequently.
- The ideal household record for insurance purposes.
- Keep records of over 700 items per diskette.

THE HOME ORGANIZER™ SERIES

The Home Organizer is more than just an electronic filing cabinet — it's a system of program modules specifically tailored for your record-keeping activity. Sort your files in any order you want, search out specific items, even make statistical calculations. Home Organizer is written entirely in "machine language" for fast operation. Now you can analyze data in revealing new ways!

Each module is specifically designed for your activity, with page formats and classifications already laid out for you. Just load the program, then insert your data disk and run. There are no formats to set up, so your entire disk is used to store data. And there's no limit to the number of data disks you can build your files on. Simple step-by-step instructions are included, and everything you need is built right into the system.

There are specialized Home Organizer modules for stamps, recipes, addresses, mailing lists, personal banking, music and book libraries, home photo and movie collections, and household inventory. Choose any or all modules that fit your needs . . . and they also make ideal gifts!
